Installation of the software

Before starting the installation, make sure the card reader is not yet connected to the PC. The software will install the drivers for reading the eID card.

Download the driver

http://eid.belgium.be/en/using your eid/installing the eid software/

Installing the eID software

The way in which you have to install the eID software depends on your operating system. Windows and Mac users can click the QuickInstall logo. For Linux users there is a manual procedure, based on the steps in the manual or on the packaging of their card reader.

Windows, Mac and Linux

Do you have your card reader, eID and PIN code to hand? Then you are ready to install the eID software. All you have to do is select your operating system and click the 'eID QuickInstall' icon. Then simply follow the on-screen instructions.

For Windows 8 users: important message. The eID-Quickinstall does NOT contain the drivers for your card reader. In case your Windows OS doesn't recognize your card reader, it's recommended to download the specific driver via the website of your card reader's manufacturer.

Click on the Windows EXE and download to disk.

Name	Date modified	Туре	Size
🖳 eID-QuickInstaller-407-7438_tcm406-243552.exe	24/03/2014 12:42	Application	45,176 KB

Open the application

Click one of both buttons to start installation (Left Dutch, right French).

eID software installeren	Kaartlezer verbinden	Gegevens bekijken			
eID software installeren Even geduld terwijl de eID software geinstalleerd wordt Installatie van Middleware 4.0.7 64bit (Quick-Install)					
		88%			

The installation will begin

Click "Install"

📀 🞫 elD Quick Installer 🗙					
eID software installeren	Kaartlezer verbinden	Gegevens bekijken			
Kaartlezer verbinden De eID software is succesvol geïnstalleerd. De Quick Installer zal vervolgens controleren of de kaartlezer correct functioneert. Verbind nu je kaartlezer(s) met de compute.					

Connect the card reader to the USB port. Make sure it is empty and does not yet have an eID card inserted into it.

You will get a message saying "The card reader has successfully connected to the PC. Insert the electronic ID card into the reader"

The eID driver will be installed

- 1. The card is read, some data will be shown to confirm the read was successful.
- 2. Click "Sluit" to close the installer
