 February 2019

Contents

1. Features
2. Installation Considerations
3. Considerations and Known Limitations
4. Compatibility of this Integration Product with Partner’s and/or other Third-Party Hardware’s Products
5. Compatibility of this Integration Product version with Partner’s and/or other Third-Party Software’s Products
6. Impacts on other Products/Features

1. Features

- Easy administration: save administration time
- Keep track of ID Expiration
- Reduce data input errors with employee, subcontractor and visitor information import
- Check the authenticity of the EID card
- Helps detect fraudulent documents
- Import the photo from the EID for later visual verification
- Selectable field mapping

2. Installation Considerations

This plugin is compatible with CCURE9000 V2.70 and above. Make sure you upgrade your C•CURE® 9000 installation before the installation of the plugin.

3. Considerations and Known Limitations

The plugin only supports **contacted** credentials. No contactless support.

4. Compatibility of this Integration Product with Partner’s and/or Third-Party Hardware’s Products

An UAE EID compatible reader is required for reading data from the EID card. Successful tests have been performed with HID Omnikey readers, generic Broadcom Contacted readers and Vasco Digipass readers.

5. Compatibility of this Integration Product version with Partner’s and/or other Third-Party Software’s Products

Table 1: Operating System Supported

Company	Product	Supported Version
	For CCURE9000 Client
