3. Considerations and Known Limitations
4. Compatibility of this Integration Product version with Partner's and/or other Third Party Hardware's Products
5. Compatibility of this Integration Product version with Partner's and/or other Third Party Software's Products
6. Impacts on other Products/Features

### 1. Features

- Synchronize panel configuration with a single command.
- Automatically creates the following components:
  - DGP's
  - Areas
  - Zones
  - RAS'es
- Listen for status updates from the panels: power, battery, comms etc.
- Monitor Activity from components
- Configure component triggers that can be used to activate events
- Send panel commands through Event Actions
- Synchronize date/time manually or schedule based
- Interrogate the device audit log through the C•CURE journal
- Supports wordlists in different languages

### 2. Installation Considerations

This plugin is compatible with CCURE9000 V2.70 and above. Make sure you upgrade your C•CURE® 9000 installation before the installation of the plugin.

The configuration of the panel must be done through UTC Software (Titan). Once configured the panel can be connected to the CCURE for synchronization and monitoring.

### 3. Considerations and Known Limitations

- The plugin only supports a limited number of the Master Command Set. For a complete reference of the supported commands, refer to Supported Messages section of the integration manual.
- Some components are not supported such as Access Control devices, Cameras, Radios, GSM modules, ISDN comms and others. This is due to redundancy (Access Control), old technology (ISDN) or other reasons. As it is not possible to obtain a complete collection of devices, we advise to test the plugin for compatibility on the functionality you require through a demo version.

### 4. Compatibility of this Integration Product with Partner's and/or Third-Party Hardware's Products

This plugin is developed on the UTC Master Classic SDK library version 2018.01.12 and only supports the Master Classic x000 series.

### 5. Compatibility of this Integration Product version with Partner's and/or other Third-Party Software's Products

See item 4.
